Career Summary

Results-driven **Flutter Developer** with **2+ year of hands-on experience** building production-ready mobile applications including **E-commerce**, **Real-time Chat**, **Community**, and **Utility** apps using **Flutter** and **Firebase**. Strong in clean UI/UX, REST API integration, state management, and scalable app architecture. Passionate about solving real-world problems and contributing to high-impact products within collaborative teams.

Technical Skills

- **Flutter & Dart**
 - **Firebase:** Authentication, Firestore, Storage, Cloud Functions
 - **REST API Integration**
 - **State Management:** Provider, Getx
 - **UI/UX:** Material Design, Responsive Layouts
 - **Local Storage:** SQLite, Hive
 - **Tools:** Git, GitHub
 - **Build & Release:** Android APK Build & Deployment
 - **Advanced Integrations:** Push Notifications, Location, Camera, **Real-time Chat**, Video Calling (Agora/Jitsi)
 - **backend development** using **Node.js**, with **MySQL** and **MongoDB** for database management, building scalable APIs and real-time data services for mobile applications.
-

Projects

CampusConnect – College/University Community Platform

- Campus-based posts, notice board, reactions, comments, and memory sharing.

- Implemented authentication, real-time feeds, and role-based access.
- **Tech:** Flutter, Firebase Auth, Firestore, Storage, Cloud Functions.

HeartWhisper – Anonymous Mental Support & Community App

- Anonymous posting, daily feeds, reactions, comments, weekly highlights, emotion-based filtering.
- Focused on privacy, performance, and user experience.
- **Tech:** Flutter, Firebase Auth & Firestore.

Moner Diary – Private Diary & Mood Tracking App

- Mood-based entries, daily logs, cloud sync, and polished tab-based UI.
- Offline-first approach with local and cloud storage.
- **Tech:** Flutter, SQLite, Firebase.

E-commerce App / UI (T-Shirt Shop)

- Product listing, GridView-based UI, custom product models, and cart-ready structure.
- Designed scalable UI suitable for full e-commerce integration.
- **Tech:** Flutter, Material UI.

Real-time Chat App

- One-to-one chat, message sync, authentication, and media-ready architecture.
- Designed with scalability and performance in mind.
- **Tech:** Flutter, Firebase Firestore/Auth.

Weather App

- Location-based current weather with **7 & 10-day forecasts** and **Bengali language support**.
 - **Tech:** Flutter, Live Weather APIs.
-

Experience

Freelance Flutter Developer – Remote / Self-employed

2023 – Present

- Delivered **5+ complete Flutter applications**, including **e-commerce and chat-based systems**.
- Built authentication flows, real-time data systems, file uploads, and reusable UI components.
- Collaborated via GitHub, managed versions, and deployed Android test builds.

Education

Higher Secondary Certificate (HSC), Science

College Name, Kushtia – 2024

Languages

- **Bengali:** Native
 - **English:** Good Working Knowledge
-

Soft Skills

- Problem Solving & Debugging
 - Team Collaboration
 - Fast Learner & Self-Motivated
 - Consistent & Detail-Oriented
